DOMUSLIFT®

YOUR PERSONAL LIFT

Free from stairs

DomusLift is the IGV Group outstanding and successful homelift, ideal for vertical transport requirements and for overcoming architectural barriers in both public and private buildings.

It is the ideal solution for elderly persons and those with impaired mobility who gain independence and freedom from stairs.

The automatic sliding doors, available on request as an option instead of the standard panel landing door, offer a user-friendly use just like any traditional lift.

The wide choice of accessories and finishes, together with S and XS versions, conceived for small spaces, and XL, designed for wide cars, makes DomusLift ideal for any requirements.

DomusLift perfectly fits any new or existing environment, while adding value to it.

10 good reasons for choosing DomusLift:

- Overcomes architectural barriers
- Compact, quiet and easy to install
- Power consumption like any household electrical appliance
- Connects to any electrical 230V outlet
- More than 50 models, for indoor and outdoor
- Standard panoramic glass door
- Reduced maintenance costs
- 3-year warranty
- Customised product
- Made in Italy

Elegance and style

The special models MADE WITH SWAROVSKI ELEMENTS, Liberty with Trend mosaic, Light-Touch by Giugiaro Architettura, Leather, Carbon, Chrome, Classic and Art Line, add exclusive style and elegance, while enhancing any environment.

DomusLift is a Made in Italy product, guaranteeing state-of-the-art technology by IGV Group. IGV Group is a company with headquarters in Milan (Italy). The company has had a leading role in the design and manufacturing of lifts and lifting platforms since 1966.

A user-friendly home

AS SIMPLE AS THAT

DomusLift quick installation procedure requires minimum builder's work, thanks to the reduced pit and headroom. The installation also needs limited regulatory approval and benefits from reduced maintenance costs and low energy consumption by using the standard household 230V mains supply.

SAFETY

The car is enclosed on three sides and the infrared barrier on the access side guarantees passengers' safety. The enabling key on the pushbutton panels prevents the use from unauthorised persons. In case of power failure, an automatic controlled device brings the car back to the landing and allows the exit of passengers.

ACCESSIBILITY

DomusLift offers a choice of extremely functional and customisable solutions with special accessories, such as the powered door opening and landing calls. DomusLift is an affordable solution ideal for those with impaired mobility or special needs.

VERSATILE

DomusLift is a truly all-around product, designed and manufactured to meet a wide range of needs and tastes. From the garage to the roof, DomusLift travels effortlessly up to seven floors.

Indoor and outdoor

ALUMINIUM SHAFT STRUCTURE

The aluminium shaft structure is exceptionally light and robust allowing to place DomusLift anywhere, even outdoor. It guarantees an enhanced usability of spaces without affecting the architectural context.

The structure is supplied as standard, the aluminium structure does not require any surface processing, it does neither deform, nor require any maintenance and it is weather-proof and does not change over the time.

MASONRY SHAFT

DomusLift can also be installed within your house in a special masonry or reinforced concrete shaft.

EXISTING BUILDINGS

Thanks to its versatility and flexibility, DomusLift is suitable also for the most challenging situations and allows the installation in any architectural context, both in new and existing buildings, buildings with historical constraints or featuring very narrow stair flights or reduced spaces.

Public places

DomusLift is the ideal solution for complete mobility within public and working areas. Thanks to DomusLift, shops and restaurants, shopping centres, offices, hotels and factories offer easy access to all levels.

Installation flexibility, large service capacity and elegant aesthetics are just some of the DomusLift key features.

Eco-sustainability

IGV Group focuses on energy saving and is fully committed to the safeguard of the natural environment.

DomusLift, the eco lifting platform, features a LED technology for the car lighting and is available in two versions: traction with inverter gearless motor for maximum performance and reduced consumptions, and hydraulic, with 100% biodegradable green oil (upon request).

DomusLift has been awarded the prestigious international certification of **Class A** energy efficiency by the certification bodies: TÜV SÜD and IMQ.

XS

Extra-Small

XS, the slimmest DomusLift ever. The new and extremely narrow DomusLift model is designed to fit the smallest shafts thanks to its extremely reduced dimensions. Shaft structure dimensions start from 65 x 91 cm.

S

Small

The S series allows the installation of DomusLift even in the narrowest shafts. The minimum car dimensions guarantee enough space for a trouble free movement. An elegant and refined solution, thanks to seamless single panel walls without aluminium profile, a wide range of finishes (plastic, painted and stainless steel laminate) and the same accessories as the standard model.

XL Extra-Large

Thanks to the car maximum dimensions up to 1200 x 1500 mm, the XL series offers plenty of space and high rated load. Also available with all-glass panels, guide rails wall excluded, up to three adjacent entrances.

DomusLift with automatic doors

The DomusLift range grows thanks to the chances offered by the European Machinery Directive 2006/42/EC. DomusLift is also available with 2-, 3- or 4-panel sliding automatic doors, featuring a reduced sill. The use of automatic doors allows for the elimination of the 'hold-to-run' operation by replacing it with the more practical and user-friendly APB (Automatic Push Button). In case of power failure, automatic return to landing and door opening are operated.

Model with 3AT automatic doors, natural anodised aluminium shaft structure and door frame, panels finished with adhesive vinyl FA-690, landing and car SuperFlat pushbutton panels.

classic

Classic style

The DomusLift Classic range is designed for those who love the warmth and natural beauty of wood. The wood effect is obtained using a special painting method on the aluminium structure.

DomusLift Chrome

Brand new geometries with perfectly matching combinations between steel surfaces with polished and satin finishes alternating on the car walls and creating a pattern of blank and solid areas.

Model with V1 full glass door, polished anodised aluminium shaft structure and car pushbutton panel embedded in the handrail.

DOMUSLIFT®

MADE WITH
**SWAROVSKI
ELEMENTS**

Crystal clear

Crystal shine, transparency and elegance are combined with high tech design. A new exclusive DomusLift is born: DomusLift MADE WITH SWAROVSKI ELEMENTS, a triumph of steel, glass and precious reflections.

Designer: arch. Arianna Callocchia

Leather inner finishes

Leather is synonym of class, elegance and superior quality for interior environments and now is also available in the range of DomusLift walls, for a new concept of luxury.

Model with gold anodised aluminium shaft structure and door frame, bronze glass, Ivory leather wall and golden SuperFlat landing pushbutton panel.

DomusLift Carbon

DomusLift dresses black tie and wears new carbon-coloured finishes and a gorgeous wall made with flower decorated glass.

Artistic homelift

The Art Line is a highly artistic range. The classic stainless steel car becomes a décor component and perfectly fits any environment. It's an all-new trend compared to traditional lifts.

ART Line

Model with 2AT window automatic doors, natural anodised aluminium finish for shaft structure, door frame and panels, 'Ramoc' car wall and 'Arcobaleno' floor.

light
touch

by GIUGIARO
ARCHITETTURA

High-tech design

The DomusLift elegance is further enriched with Giugiaro Architettura innovative lighting system, offering new in-car environments and atmospheres and the subtle sophistication of the touch screen control panel.

Liberty appeal

The unique Liberty mosaic made with handcrafted glass shapes lighting effects by alternating smooth and wavy, chromed and iridescent tiles, which enhance and beautify DomusLift surfaces.

by  trend
trend-group.com

Model with panel panoramic door, RAL 9010 painting for shaft structure, door frame and car profiles, bronze glass, car wall and floor with Liberty Amber mosaic.

Optional

Technical features

HYDRAULIC

- Complying with European 2006/42/EC Machinery Directive
- Machine roomless hydraulic drive
- Direct telescopic suspension or roping version
- Load up to 300 kg
- Stops up to 7, travel 12 m
- Pit starting from 55 mm, headroom from 2350 mm
- Speed 0.15 m/s

Special features for XL model:

- Pit 120 mm min
- Headroom 2500 mm min
- Stops up to 7, travel 17 m
- Rated power 2.2 kW for 400 kg load
- 1 or 2-piece ram

Dimensions (mm)	min	max
Car	480 x 550	1200 x 1500
Masonry shaft (internal dim.)	670 x 820	1530 x 1650
Shaft structure (external dim.)	650 x 910	1700 x 1730

Dimensions (mm)	min	max
Car	830 x 1030	1200 x 1500
Masonry shaft (internal dim.)	1160 x 1290	1650 x 1780
Shaft structure (external dim.)	1340 x 1385	1810 x 1880

Shaft and shaft structure dimensions depend on access number and layout.

ELECTRIC GEARLESS WITH COUNTERWEIGHT

- Complying with European 2006/42/EC Machinery Directive
- Machine roomless (MRL)
- Gearless machine, with counterweight
- Load up to 400 kg
- Stops up to 7, travel 20 m
- Pit 200 mm, headroom 2500/2600 mm
- Speed 0.15 m/s
- Extremely silent (50 dBA)
- Minimum consumptions (0,031 kW in standby)

Dimensions (mm)	min	max
Car	830 x 1130	1130 x 1400
Masonry shaft (internal dim.)	1320 x 1250	1620 x 1510
Shaft structure (external dim.)	1490 x 1500	1790 x 1650

Dimensions (mm)	min	max
Car	830 x 1130	1130 x 1400
Masonry shaft (internal dim.)	1310 x 1390	1610 x 1690
Shaft structure (external dim.)	1500 x 1490	1780 x 1785

Shaft and shaft structure dimensions depend on access number and layout.

SINGLE ACCESS

2-ADJACENT ACCESS

2-OPPOSITE ACCESS

3-ACCESS

Power unit

The standard controller is provided in a special cabinet of small dimensions. It can be easily installed in the cellar or garage, because it can be installed up to 7 metres far from the DomusLift.

Cabinet dimensions:

- 1 DomusLift hydraulic: **600 x 280 x h 1000/1160 mm**
- 2 DomusLift electric gearless with counterweight: **600 x 280 x h 1160 mm**
Model embedded in the door frame: **370 x 200 x h 2285 mm.**
- 3 DomusLift XL hydraulic: **720 x 360 x h 1500 mm** for travels up to 13 m
950 x 400 x h 1850 mm for travels > 13 m

Cabinet supplied as standard with RAL 1015 painting.

Leading company in the production of customised products since 1966

Founded by Giuseppe Volpe in 1966, IGV Group is worldwide renown for the design and production of Domuslift lifting platforms and lifts with reduced pit and headroom. IGV exports to more than 70 countries 70% of its total production, representing the excellence of Made in Italy. For more than 50 years, IGV has been designing and manufacturing thousands of solutions for the vertical mobility, specialising in bespoke systems and exporting worldwide the Made in Italy style and innovative technology.
